PROFESSIONAL SUMMARY

Data Analyst with an MSc in Computer Science (Data Analytics) and IEEE-published research, experienced in transforming complex data into actionable business insights through SQL, Python, Power BI, ETL, and data visualization. Skilled in data cleaning, feature engineering, reporting, dashboard development, and building data-driven solutions to support business decision-making and process improvement. A proactive problem solver with strong analytical and communication skills, committed to delivering accurate, scalable, and impactful data solutions. Stamp 1G visa holder, fully eligible to work full-time in Ireland and available for immediate start.

WORK EXPERIENCE

Freelance Web Developer

Nov '23 — Present

Freelance

Galway, Ireland

- Role: Designed and developed responsive websites for clients across multiple industries, gathering business requirements, implementing front-end solutions, and managing website deployment, testing, and ongoing maintenance.
- Tools & outcome: Utilized HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, Git, and GitHub to develop responsive web applications, optimize website performance, implement basic analytics, and generate SQL-based reports to support business insights and client decision-making.

Deli Manager

Sep '24 — Jun '26

Daybreak Galway

Galway, Ireland

- Role: Managed daily deli operations, coordinated staff schedules, maintained HACCP compliance, supervised inventory, and ensured high standards of customer service and food quality.
- Tools & outcome: Utilized HACCP procedures, inventory management systems, Microsoft Excel, and POS systems to optimize stock control, reduce waste, improve operational efficiency, and support consistent service delivery through staff training and process improvements.

Graduate Teaching Assistant (CT2102)

Oct '24 — May '25

University of Galway

Galway, Ireland

- Role: Supported the delivery of Java and Web Application Development modules by preparing laboratory materials, assisting students during practical sessions, and evaluating coursework.
- Tools & outcome: Utilized Java, HTML, CSS, JavaScript, Git, and Moodle to deliver practical instruction, standardize grading, provide technical guidance, and improve student engagement through structured lab activities.

Data Analysis Assistant

Jan '23 — Feb '24

8Queens Software Technologies Pvt. Ltd.

Tamil Nadu, India

- Role: Assisted in data collection, preparation, validation, and analysis to support reporting requirements and improve the accuracy of business datasets.
- Tools & outcome: Utilized Python, SQL, Microsoft Excel, Google Sheets, and GitHub to perform data cleaning, quality validation, reporting, and documentation, ensuring reliable datasets for business analysis and collaborative development.

Java Intern

Feb '22 — Dec '22

Paxel Techno Labs

India

- Role: Assisted in the development, testing, and maintenance of Java-based applications while collaborating with development teams to implement software enhancements and resolve technical issues.
- Tools & outcome: Utilized Java, MySQL, Git, and Eclipse to develop application modules, perform testing and debugging, document implementations, and improve software reliability and maintainability.

EDUCATION

MSc in Computer Science (Data Analytics), University of Galway (GPA: 2:1)

'24 — '25

Galway

B.Tech in Computer Science and Business Systems, Sri Sairam Engineering College (GPA: 8.9/10)

'20 — '24

Tamil Nadu, India

TECHNICAL SKILLS

Skills Cyber Security, Machine Learning Model Development Using Flask, Software Testing, Computer Networks and Protocols, JavaScript, CSS, Oracle Java Fundamentals, PHP and MySQL, SQL for Data Analysis, Microsoft Power BI Data Analytics, Microsoft Excel for Data Analysis, Python for Data Science, Data Visualization with Power BI, Data Warehousing Fundamentals, ETL and Data Pipelines, Git and GitHub, Microsoft Azure Data Fundamentals (DP-900), Google Data Analytics Professional Certificate, Arduino

RESEARCH PUBLICATIONS

PROJECTS

Investment Portfolio Analytics & Reporting Platform

- Role: Designed and developed an end-to-end investment analytics platform to manage portfolio and fund performance data. Responsible for SQL database design, data modelling, ETL processes, reporting automation, and business intelligence development to support investment performance analysis.
- Tools & Outcome: Utilized SQL, Python, Power BI, and Excel to build automated data pipelines, perform portfolio performance analysis, and create interactive dashboards tracking ROI, asset allocation, investment trends, and fund performance. Implemented data quality validation and automated reporting workflows to deliver accurate, business-ready insights.

Financial Data Warehouse & Automated ETL Pipeline

- Role: Developed a centralized financial data warehouse by integrating data from multiple business sources. Led data extraction, transformation, loading (ETL), and dimensional modelling to improve reporting efficiency and support business decision-making.
- Tools & Outcome: Leveraged Python, SQL Server, Power BI, and Git to automate data ingestion, cleansing, and transformation processes. Designed SQL reporting procedures and interactive dashboards presenting executive KPIs, financial metrics, and operational insights while improving reporting consistency through automated validation and exception handling.

Fund Accounting Reconciliation & Data Quality System

- Role: Built a reconciliation and data quality solution to validate fund accounting transactions and financial records across multiple datasets. Responsible for developing reconciliation logic, exception reporting, and data validation processes to improve reporting accuracy.
- Tools & Outcome: Used SQL, Python, Power BI, and Excel to automate transaction matching, identify missing and duplicate records, reconcile NAV and cash movements, and generate interactive dashboards monitoring reconciliation status, data quality metrics, and operational KPIs. Enhanced reporting reliability through automated validation and exception management.

Aer Lingus Flight Network Analysis

- Role: Conducted network analysis on Aer Lingus flight route data to identify connectivity patterns, optimize route insights, and support data-driven decision-making. Responsible for data cleaning, SQL-based data preparation, feature engineering, and exploratory analysis.
- Tools & Outcome: Utilized SQL, Python, NetworkX, and Power BI to develop ETL workflows, perform network analytics, and build interactive dashboards visualizing route centrality, connectivity, and operational performance. Delivered actionable insights to support route planning and network optimization.

Smart Healthcare Assistant (NLP Chatbot)

- Role: Developed an AI-powered healthcare assistant to provide symptom assessment, health guidance, and appointment recommendations. Responsible for NLP pipeline development, data preprocessing, intent recognition, conversational workflow design, and business requirement analysis.
- Tools & Outcome: Leveraged Python, NLP, machine learning, Flask, and SQL to implement data preprocessing, model development, response validation, and chatbot integration. Improved response accuracy through iterative testing, data quality validation, and continuous model refinement while delivering a scalable conversational solution for end users.
